PROFILE

A curious full-stack developer with experience in building web applications. I love turning problems into simple, beautiful, and intuitive solutions. When I'm always learning to code, you can find me exploring new technologies, contributing to open-source projects, or enjoying a good cup of coffee while planning my next project. My goal is to create digital experiences that not only look great but also provide real value to users and businesses.

WORK EXPERIENCE

- Associate Software Engineer (LeftclickTech)** April - (2026)
 - Developed the full stack in house human resources and leave management system with features like machine and manual check-in and out, automatic invoice generator, email sender, ticket, leave calendar and leave balancer.
 - Worked on the Australian disability insurance system, NDIS.
 - Developed the complete automation workflow for AI content generation and bulk outreach email sender using n8n and python scripts.
 - Worked closely with different LLMs and AI agents
- Software Developer (Amplify Views)** June -Dec (2025)
 - Built an AI-powered interactive web platform for user-friendly AI conversations.
 - Integrated external AI APIs to deliver dynamic, real-time responses.
 - Implemented secure authentication and data uploads for personalized AI interactions.
 - Collaborated with team and client to develop scalable, long-term features.

ACHIEVEMENTS

- TBC Startup Fest, The British College, Kathmandu, Nepal**
 - I was selected for Top 50 Ideas among more than 1000 applicants.
 - Won the first-runner-up award.

EDUCATION/CERTIFICATIONS

- Bachelor Of Computer Science** 2023-2026
